ABOUT ME

I am a graduate of the Bachelor's program in Mechanical and Biosystems Engineering aspiring Software Engineer who values accountability, adaptability, and problem-solving. With experience in software engineering, I contributed to developing and optimizing software solutions by analyzing system requirements and resolving technical issues to improve application stability and performance. I have skills in application development using HTML, CSS, JavaScript, PHP, and SQL, and I am able to translate system requirements and technical issues into effective software solutions. I recently completed a software engineering bootcamp at RevoU to strengthen my frontend and backend development skills. I am eager to bring my analytical mindset, technical skills, and commitment to continuous learning to a Software Engineer role and contribute meaningful impact to the team.

EDUCATION

Institut Pertanian Bogor (IPB University)

Kab. Bogor, Jawa Barat

Bachelor's Degree of Engineering (GPA 2.80)

July 2025

- Coursework: Introduction to Entrepreneurship, Engineering Entrepreneurship, Community Development, Robotic Technology, and Automatic Control
- Thesis: Detection of Leaf Scorch, Leaf Blight, and Leaf Spot Diseases in Strawberry Plants (*Fragaria* sp.) Based on Deep Learning
- Community Service: Training on High Value-Added Processed Food Products (Desa Tempuranduwur, Kecamatan Sapuran, Kabupaten Wonosobo)

RevoU

Intensive Online Class (Bootcamp)

January 2026

- Coursework: Full-Stack Software Engineering
- Final Project: RevoEdu (Learning Management System Platform)

PROJECT EXPERIENCE

Portofolio

Remote

Responsive Web Pages

July 2025 – August 2025

- Created the HTML structure for a personal website with multiple responsive pages using semantic HTML to improve layout clarity and usability.
- Styled website sections using CSS, applying Flexbox and media queries to achieve responsive layouts across multiple screen sizes.
- Deployed an end-to-end personal website on GitHub Pages, supported by structured README documentation outlining features and technologies used.

RevoFun

Remote

Interactive Website

September 2025

- Developed an interactive gaming landing page with multiple game sections using JavaScript for DOM manipulation and event handling.
- Implemented at least three JavaScript-based games using conditional logic, loops, and functions to deliver interactive browser gameplay.
- Integrated dynamic navigation and user interactions using event listeners, improving usability across the landing page and individual game pages.

Revoshop**Remote***Front-end Application**October 2025 – November 2025*

- Developed Next.js e-commerce pages with dynamic routing, implementing SSG and SSR to display multiple products from external APIs.
- Implemented authentication, shopping cart, and full CRUD functionality using Context API, middleware, and Next.js API routes.
- Optimized application performance by applying ISR, caching strategies, and unit testing key components using Jest and React Testing Library.

RevoBank-API**Remote***Back-end Development**December 2025 – January 2026*

- Designed a relational database schema with Prisma, implementing User, Account, and Transaction models to support secure banking operations.
- Developed RESTful banking APIs using NestJS, implementing JWT authentication and modular architecture to secure multiple CRUD endpoints.
- Deployed a tested NestJS banking API to a cloud platform, ensuring reliable access, secure authentication, and documented endpoints.

RevoEdu**Remote***Comprehensive Real-world Applications for Coding Knowledge**January 2026*

- Developed a full-stack Learning Management System using Next.js, implementing role-based authentication and core features for multiple user roles.
- Implemented full CRUD functionality for courses, enrollments, and progress tracking, integrating frontend components with backend APIs.
- Deployed frontend and backend LMS applications with separate repositories, delivering a production-ready system supported by clear technical documentation.

SKILLS

Technical Skills: Application Logic Development, Building Responsive and Accessible Web Interfaces, Component-Based Frontend Development and Dynamic Routing, Designing and Managing Relational Databases, Integrating Frontend and Backend Services, Code Collaboration and Version Management, Implementing Role-Based Application Security.

Tools / Softwares: Visual Studio Code, Git & Github, Node.js, Next.js, React.js, Prisma ORM, PostgreSQL, NestJS, Render, Vercel

Non-Technical Skills: Communication, Relationship Building, Problem Solving, Adaptability, Team Collaboration, Continuous Learning Mindset.
